Kinetic Explorations

What can a library be in the Dharavi context? It can be about explorations, discovering and try out new things. By this structure the people in Dharavi will be encourage to see the site in a way they are not used to and through that get new perspectives on their old ways of think. A walk though the structure will create a curiosity to explore more of it. One way leads to an other but in the end they all come together like a maze easy to solve.
